Core Reading List (Valid & Directly Relevant)

- **1. CP-AnemiC: A conjunctival pallor dataset and benchmark (2023)** *your main reference*
  - **Paper:** https://doi.org/10.1016/j.medntd.2023.100244 (open access)
  - **Dataset:** CP-AnemiC — https://doi.org/10.17632/m53vz6b7fx.1 (Mendeley, public)
- **2. Illumination-Robust Conjunctival Image Preprocessing (iJOE 2025)** *biggest overlap with your Experiment B*
  - **Paper:** https://doi.org/10.3991/ijoe.v21i07.54439 (open access)
  - **Datasets:** CP-AnemiC (above) + Eyes-defy-anemia
- **3. A Reproducible Mobile-Cloud Framework for Anemia Screening (IJACSA 2026)** *biggest overlap with your Experiment D*
  - **Paper:** https://thesai.org/Downloads/Volume17No8/Paper_4-A_Reproducible_Mobile_Cloud_Framework.pdf (open access)
  - **Dataset:** Private — collected by INTI-Lab, Lima, Peru (1,240 images, not public). ⚠️ Read it to know your competition, but you can't reuse its data.
- **4. Performance Analysis of Post-Training Quantization (arXiv 2025)** *your MobileNet-on-CP-AnemiC baseline*
  - **Paper:** https://arxiv.org/abs/2507.15151 (open access)
  - **Dataset:** CP-AnemiC (above)
- **5. An Intelligent Non-Invasive System... Novel Dataset (Dimauro et al., AI Medicine 2023)** *your possible second dataset*
  - **Paper:** https://doi.org/10.1016/j.artmed.2022.102477
  - **Dataset:** Eyes-defy-anemia — 218 images, Indian + Italian patients (adults, controlled lighting device). Available through the authors; uniba.it record: https://ricerca.uniba.it/handle/11586/415994
- **6. Deep Learning Detection of Anemia from Conjunctiva Images (Healthcare Informatics Research 2025)** *useful as "what not to do" example*
  - **Paper:** https://pmc.ncbi.nlm.nih.gov/articles/PMC11854623 (open access)
  - **Dataset:** ⚠️ Mixed adult data — 710 online images (ages 16–59, source database) + 54 own smartphone images. Not children's data, not CP-AnemiC. Read for methodology comparison only.
